# Spadework

⌘ You need to have a compact story

☑ So that people know what they can expect from you

☑ So that people know what they *can't* expect from you

⌘ *You need to execute on that story!*

☑ "If it was just hot air, we'd still be in Sieg Hall"

⌘ You need to *communicate* the story

# Our story

- ⌘ CSE is a field that's more important than any other
- ⌘ We're a top-10 research program
- ⌘ We provide an education that's as good as any in the nation, for Washington's top students
- ⌘ We have a record of entrepreneurial success that goes back more than 25 years
- ⌘ We make all this pay off for Washington

# Executing on the story

⌘ “Being the president of a university is a lot like being the caretaker of a cemetery: You have a lot of people under you, but none of them seem to be listening.”

William R. Brody, President  
Johns Hopkins University

## ⌘ As chair, how can you improve teaching performance?

- ☑ Support the introduction of “capstone design courses” through teaching assignments, funding, and recognition
- ☑ Nominate faculty for the university-level Distinguished Teaching Award
- ☑ Convince the student group to introduce a departmental teaching award

- 
- ☒ Distribute quarterly histograms of student course evaluations to all instructors
  - ☒ Follow up with personal kudos to high performers, and suggestions to consistent low performers
  - ☒ Insist on honest, thorough, and constructive peer evaluations of teaching
  - ☒ Actively support students in seeking employment and in transitioning to graduate school
  - ☒ ...

# Communication

⌘ Professionally designed web pages (home page and next level only!)

☑ Identify audiences!

Looking south from Queen Anne hill

**University of Washington Computer Science & Engineering** includes roughly forty faculty members, forty staff members, two hundred seventy five graduate majors (150 in the Doctoral program and 125 in the Professional Masters Program), and four hundred fifty undergraduate majors. Ranked among the top ten programs in the nation, we are active in most of the principal areas of the field, and are engaged in a broad range of interdisciplinary initiatives. We are located in the spectacular new [Paul G. Allen Center for Computer Science & Engineering](#) at the center of the UW campus in Seattle, Washington -- a national and international technology center in software, biotech, the health sciences, and other fields.

**Spotlight** — Baer, Wang win first annual ISCA Influential Paper Award —

**Dedication of the Paul G. Allen Center for Computer Science & Engineering**

October 8 and 9 were momentous days for CSE as we dedicated our extraordinary new home and welcomed visitors. Dollar by dollar and brick by brick, the Allen Center was built through the generous support and dedicated work of so many. Tom Alberg and Jeremy Joeh, campaign co-chairs, helped galvanize private funding. Lead donors Paul G. Allen, the Bill & Melinda Gates Foundation, and Microsoft Corporation were key to ensuring the doors would open. More than 250 donors (see pages 5-6) affirmed strong community support for CSE's mission and goals. Our thanks to all. Faculty, staff, and students are thrilled with the facility. Education and research are in full swing in our terrific laboratories. The future is exciting. Come visit soon!

## Allen Center Wins Rave Reviews at Dedication

The doors officially opened on October 9, the visitors streamed in, their eyes widened, and many exclaimed "Wow!" No words of praise meant more, however, than the one from Paul G. Allen — "Stunning!"

Clearly the building design had achieved its goals — a great facility where people can do great work. Allen said it all in responding to a question about his impression of the Center. "I'm proud to have supported this beautiful and unique facility, but what really sets UW's computer science program apart are the people — the faculty and the students. ... at the end of the day it's the excitement, intelligence, and innovation of the men and women in this organization that make it what it is. The faculty here is unparalleled, and the undergrad and graduate students are dedicated and inspiring."

Hank Levy, faculty coordinator of Allen Center design and construction; Paul Allen; David Nofkin, CSE chair; and Ed Lazowska, past CSE chair and faculty leader for the Allen Center campaign

# Two-page "overview" that tells the whole story in snapshot form

## An Overview of University of Washington Computer Science & Engineering

### Undergraduate Education

- Ranked among the top ten undergraduate programs in the nation by *US News*
- Won four *UW Distinguished Teaching Awards* in the past ten years
- Won the first *UW Brotman Award for Instructional Excellence*
- In 2004, student recognition included our third *Arts & Sciences Dean's Medalist* in a row, two *Goldwater Scholars*, and a *Rhodes Scholar* finalist (one of 4 in the past 5 years, including 2001 Rhodes recipient Emma Brunskill)
- Fifteen students recognized in the past 5 years in the *Computing Research Association Outstanding Undergraduate Award* competition – winners, runners-up, finalists, and honorable mention recipients
- In recent years, UW has been the nation's #1 supplier of new college graduates to Microsoft, the #1 supplier among its focus schools to Intel, the #2 supplier to IBM, and the major supplier to many outstanding regional technology firms
- Extensive involvement of undergraduates in research and in industrial co-ops/internships
- Hallmark *Capstone Design Courses* in fields such as embedded systems, digital animation, internet systems, videogames, digital systems, VLSI, computer telephony, and more

### Graduate Education

- Ranked among the top ten graduate programs in the nation by *US News* and the *National Research Council* – for Computer Science, for Computer Engineering, and for all three Computer Science specialties ranked by *US News* (Artificial Intelligence, Systems, and Theory)
- In a recent *National Doctoral Program Survey* funded by the Sloan Foundation – a survey of students regarding departmental adherence to "best practices" in graduate education – rated #1 among all Computer Science graduate programs in the nation, #1 among all Computer Engineering programs, and #1 among all programs in engineering
- Won the second *UW Distinguished Graduate Mentor Award*
- In 2004, UW CSE Ph.D. AnHai Doan received the *ACM Distinguished Dissertation Award*. (In 2003, UW CSE faculty member Venkat Guruswami received the award for his MIT dissertation. In 2001, two of the three students recognized in the competition were UW CSE Ph.D.s – William Chan and Mike Ernst.)
- Ph.D. student Steve Wolfman received the 2002 *UW Excellence in Teaching Award* (for graduate teaching assistants)

Former UW CSE department chair Ed Lazowska spent 2001-02 on sabbatical at UC San Diego, where there are six UW CSE alumni on the Computer Science & Engineering faculty! L-R: Stefan Savage, UW CSE Ph.D. 2002; Bill Ginswold, UW CSE Ph.D. 1991; Fran Berman, UW CSE Ph.D. 1979; Ed Lazowska; Geoff Voelker, UW CSE Ph.D. 2000; Dean Taitzen, UW CSE Ph.D. 1996; Brad Calder, UW CSE B.S. 1991.

### and Innovation

ernet and modern Integrated Circuit design to the Pacific Northwest companies such as DECwest Engineering, Tera/Cray, Intel Research funded companies such as Aldus, Visio, IC Designs, Digital Research, Dialogic. zen new companies founded in recent years – strong ties to the region's community (Impinj – <http://www.impinj.com> – is an ple of a recent startup closely tied to our computer ivities)

gies transferred to existing companies – WebCrawler (the first full-text web MetaCrawler (the first web meta-search engine), Simultaneous (commercialized by Intel as HyperThreading), and others

ign and implementation of Washington's award- Educational Telecommunications Network l2 and community colleges has been recognized with the *UW Outstanding Award* and with the Seattle Alliance for Education's *A+ Partnership Award* ng efforts have been recognized *twice* with the national *R1edu Award*

### Center for Computer Science & Engineering

ctumn 2003  
bratory space, and more than double our total space  
a recently-completed building for UW's Electrical Engineering Department  
project:

- from the Legislature
- from UW
- \$42 million from private sources
  - \$14 million from Paul G. Allen
  - \$7.2 million from Microsoft Corporation
  - \$6.5 million from Bill & Melinda Gates
  - \$15 million from more than 250 other friends and alumni in the region's software and venture communities

The Paul G. Allen Center for Computer Science & Engineering  
Dedicated Autumn 2003

### The Campaign for CSE

- Continues with a goal of \$20 million for endowments – "the people part"

### Further Information

- Department home: <http://www.cs.washington.edu/>
- Department news: <http://www.cs.washington.edu/news/>
- Department capstone design course videos: <http://www.cs.washington.edu/videos/>

- The Campaign for CSE: <http://www.cs.washington.edu/campaign/>

## ⌘ Intensive involvement with community organizations:

- ☑ Washington Software Alliance
- ☑ Washington Technology Alliance
- ☑ American Electronics Association
- ☑ Venture community
- ☑ Legislature
- ☑ Regents
- ☑ Federal affairs representative

# The campaign

---

⌘ 2.5 years: September 2000 - June 2003

⌘ \$42M

☑ 10 gifts of \$1M or more

☑ ~100 gifts of \$25K or more

☑ >250 gifts in all

⌘ >50% of my personal time

⌘ Professional development staff varying from 0 to 4 FTE

⌘ Two external co-chairs

# The bad news

- ⌘ No time for extensive cultivation
- ⌘ Couldn't wait for people to die
- ⌘ Tech downturn (Q4 2000)
- ⌘ Dismal story of a recent state-funded EE project

# The good news

- ⌘ We had a compact story that we had been executing and communicating
  - ☑ Our graduates are fantastic and remain in the region
  - ☑ We had created a number of companies and transferred technologies to existing companies
- ⌘ I was well connected personally to alumni, regional tech leaders, the regional venture community
- ⌘ Tremendous support from key UW Regents

# Lessons

- ⌘ "If it was just hot air, we'd still be in Sieg Hall"
- ⌘ It's not just philanthropy - there's a clear value proposition
- ⌘ It takes *serious* faculty involvement
- ⌘ Just "telling the story" is worthwhile
- ⌘ It's incredibly rewarding (e.g., re-connecting with alums)

- 
- ⌘ Many prospects can make quick decisions
  - ⌘ But patience and persistence can pay off
  - ⌘ Momentum is everything (e.g., the venture community - bandwagon effect)
  - ⌘ You can't get big money from the community relations division of a company
  - ⌘ Deadlines help

⌘ For endowments, need to dope out the specific interests of individuals

☑ Undergraduate alumni

☑ Entrepreneurs

☑ Diversity

⌘ Development professionals add a great deal

☑ Strategy, execution, organization, events

☑ Requires mutual respect and learning
