

# Integrating Diversity in Engineering Capstones

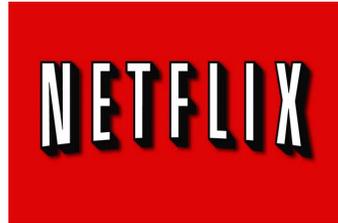

---

# Problem Statement

---

**Disabilities and Innovation:** Interfaces with users often lack consideration of disabilities and accessibility

hulu

W

# **Our Idea**

---

**An extra credit option for integrating an accessibility and/or diversity consideration for all capstone projects in order to encourage awareness of and interest in diversity**

- > Annotated bibliography and implementation of the diversity consideration**
- > 3% EC for overall grade**
  - .5% to write the annotated bibliography**
  - 2.5% to implement the consideration**

# Intervention

---

- > **Start with Capstone teachers and have them implement the EC as a proof of concept**
  - **Statistics on overall class participation and students' mindsets on diversity in engineering before and after (survey)**
- > **Bring that teachers' experience to their department and have department-wide proofs of concept**
- > **Bring those departments' experiences to the Dean of the CoE**

# Expected Results

---

- > **Students think about accessibility/diversity before many will enter the workforce**
- > **In action: LSU Students Complete Beach Wheelchair Capstone**
